

## **LIPERA**

The project is based in Wodanga in western Kenya and is supported by Ludlow Local Meeting.

The project had previously successfully encouraged orphans to continue their education to secondary school and beyond, and realised that abandoning them at this stage would have serious consequences, and decided to find ways to help them find gainful employment. The project will support the young people in a start-up business network, selling maize, establishing a small juicing business and setting up a cyber café.
